

WHITE PAPER

ISO 22301:2012

Business Continuity Management System

Minimize the risk of business gaps within business community.

Success through management excellence

ISO 22301:2012 is the standard for business continuity reduce the societal security relevant to business community and their raising demands of business continuation.

Whether company belongs to any sector or industries this marvelous standards always remain the point of attention to make thier business incidents less thurgh the compliances of BCMS.

British Standard BS 25999 was a two-part business continuity management standard. “BS 25999-1:2006 Business Continuity Management. Code of Practice” offered pragmatic implementation guidance, but was withdrawn in 2012 when ISO 22313 effectively superseded it. “BS 25999-2:2007 Specification for Business Continuity Management” formally specified a set of requirements for a business continuity management system. It too was withdrawn in 2012 when it was (in effect) replaced by ISO 22301.

ISO 22301:2012, "Societal security – Business continuity management systems – Requirements", specifies a management system to manage an organization's business continuity arrangements. It is formal in style in order to facilitate compliance auditing and certification. It is supported by ISO 22313:2012, "Societal security – Business continuity management systems – Guidance" which provides more pragmatic advice concerning business continuity management. ISO/IEC 27031:2011, "Information security – Security techniques – Guidelines for information and communication technology [ICT] readiness for business continuity" offers guidance on the ICT aspects of business continuity management.

ISO 22301:2012 specifies requirements to plan, establish, implement, operate, monitor, review, maintain and continually improve a documented management system to protect against, reduce the likelihood of occurrence, prepare for, respond to, and recover from disruptive incidents when they arise.

The requirements specified in ISO 22301:2012 are generic and intended to be applicable to all organizations, or parts thereof, regardless of type, size and nature of the organization. The extent of application of these requirements depends on the organization's operating environment and complexity.

Why Global Standards be your selection as your strategic partner to guide you for better implementation.
