

# WHITE PAPER

## OHSAS 18001:2007

Occupational Health and Safety  
Management System

A comprehensive international  
standard for health & safety

*Success through management excellence*

Global Standards is happy to guide about Occupational Health and Safety Management - OHSAS 18001:2007 in a way that can easily be understood. The needs of OHS is the most desirable thing during Occupation and Employment seeking to have a standard through which Health and Safety can be secured from any undesirable incident

In this white paper the benefits and features have been Defined

**OHSM standard is subject to a regular review under the rules of BSI committee. British Standard Committee continuously reviews the standard as per review policy to ensure the impact globally.**

The OHSAS 18001 standard has become an international reference for Health & Safety management requirements.

OHSAS 18000 is an international occupational health and safety management system specification. The specification is comprised of two parts, 18001 and 18002, and embraces BS 8800 and a number of other publications.

The standard follows the structure of ISO 14001, requiring top-level commitment to compliance with legislation, prevention of accidents, promotion of good health and continual improvement.

The OHSAS specification is applicable to any organization that wishes to:

- Establish an OH&S management system to eliminate or minimize risk to employees and other interested parties who may be exposed to activities with OH&S risks
- Assure compliance with its own OH&S policy
- Demonstrate such compliance to the stakeholders
- Implement, maintain and continually improve an OH&S management system
- Make a self-determination and declaration of compliance with this OHSAS specification.
- Seek third party independent certification of its OH&S management system

An OHSAS 18001 audit assists in a variety of business respects. It helps to minimize risk to employees and other interested parties; improve an existing OH&S management system; demonstrate Diligence; gain assurance; among others. The Occupational Health and Safety Management System supports organizations to create a culture of safety and maintain business sustainability.
